---

Dear Hiring Manager,

I am an enthusiastic and detail-oriented Computer Science undergraduate with strong experience in both UI/UX design and front-end development. My academic background and hands-on industry experience have given me a solid foundation to create intuitive, visually appealing, and responsive digital products that enhance user experiences and business outcomes.

During my internship at Tabrane Pharmaceuticals, I designed and deployed the company's official website, ensuring responsiveness and seamless functionality. I also collaborated with cross-functional teams, supported IT operations, and worked with SAP-related systems, which strengthened my ability to deliver results in dynamic environments.

In addition, I have successfully designed and developed several web applications and interactive solutions, including a full-stack campsite booking system, e-commerce platforms, and a React-based pet shop interface. These projects sharpened my expertise in React.js, JavaScript, PHP, MySQL, Figma, and responsive design principles, while reinforcing my passion for user-centered design and usability testing.

I am eager to contribute to an innovative team where I can apply my technical skills and creative approach to build high-quality, impactful digital solutions. I thrive in collaborative environments, continuously seek new learning opportunities, and remain committed to delivering designs and applications that combine aesthetic appeal with functionality.

Thank you for considering my application. I welcome the opportunity to discuss how my skills and experience align with your team's goals.

Sincerely,

Chenuka Rupasingha

Colombo, Sri Lanka
